

# Data redundancy

Redundancy configuration	Deployment	Durabi
LRS	Single Datacenter in the primary region	11 nir
ZRS	Three Availability zones in the primary region	12 nir
GRS	Single datacenter in primary and secondary regions	16 nir
GZRS	3 availability zones in the primary region and single datacenter in secondary region	16 nir

## Storage redundancy

why do we need a read only access after any kind of crash **read only GRS**.
