# Note

- when we install Application Gateway. it will request information regarding network.
- So we need to assign dedicated subnet for Application Gateway.

Configuring Application Gateway

tier:

1. Standard (load Balancer)

2. Standard V2 (load Balancer, Auto Scaling and Availability zone)

3. WAF (load Balancer, Firewall)

4. WAF V2 (load Balancer, Firewall, Auto Scaling and Availability zone).
